

KEEP TALKING AND NOBODY EXPLODES:
The Physical Model

CLASSIFIED

Bomb Defusal Manual

Kyle Graham—Caleb Walker—Nicholas Warner—Khayman West

On the Subject of Passwords

And you thought that spelling would never kill you.

- The triangular pointer on the LCD denotes the currently selected tumbler.
- To select a different tumbler, move the joystick next to the LCD left or right. Once the desired tumbler is selected, rotate the tumbler by moving the joystick up or down.
- You must rotate the tumblers to form one of the words listed in the table below.
- When all of the tumblers have been rotated to display the password, enter the password by pressing the small black button.
- If the password is accepted, the green LED will illuminate and this module will be defused.
- However, if the wrong password is entered, the red LED will flash once, and if a sequence of letters not contained in the table below is entered, the red LED will illuminate and you will receive a strike!

ALPHA	AMPLE	ARMED	BOLTS	BOMBS
BRAVO	CHAOS	COURT	CRIME	DAISY
DAZED	DIZZY	EMPTY	EXCEL	EXILE
FAITH	FORTS	FUZZY	PIPES	PIZZA
QUACK	QUEEN	ROMEO	RITZY	RUINS

On the Subject of Needy Modules

Submodule: Lights

Remember those Mario Party 1 minigames where it hurt to rotate the joystick? Well, if you don't rotate the joystick, it'll hurt a whole lot more.

- There are 6 LEDs on the bomb that will shut off one by one.
- If all 6 LED's are off for more than 4 seconds, you will receive a strike.
- To charge this module, locate the joystick beside the lights and wind it to power it up.
- Once you have received a strike, the lights will all turn back on and resume their countdown. You can receive multiple strikes from this!

Submodule: Tilt

Ever been tipsy and exploded at someone? Yeah, this bomb's the same way.

- Inside the bomb are tilt switches.
- If the bomb is tilted in any direction for too long, you will receive a strike.
- There is a yellow warning light that illuminates should the bomb be tilted and a red that will turn on briefly to alert you to having received a strike. You can receive multiple strikes from this!

On the Subject of Simon Says

This game is child's play... child's play with deadly consequences.

1. One of the four colored lights will flash.
2. Using the table below, press the button next to the light of the corresponding color. The serial number is located on the Passwords module.
3. The original light will then flash, followed by another. Repeat this sequence using the color mapping.
4. The sequence will lengthen by one each time you correctly enter a sequence until the module is disarmed.

If the serial number contains a vowel:

		Red Flash	Blue Flash	Green Flash	Yellow Flash
Button to Press	No Strikes	Blue	Red	Yellow	Green
	1 Strike	Yellow	Green	Blue	Red
	2 Strikes	Green	Red	Yellow	Blue

If the serial number does **NOT** contain a vowel:

		Red Flash	Blue Flash	Green Flash	Yellow Flash
Button to Press	No Strikes	Blue	Yellow	Green	Red
	1 Strike	Red	Blue	Yellow	Green
	2 Strikes	Yellow	Green	Blue	Red

On the Subject of Morse Code

There's a reason why some things are better off just buried in the sands of time. This is one of those things, and you'll soon find out the reason why.

- Interpret the signal from the flashing light using the Morse Code table below to spell one of the words in the table.
- The signal will loop, with a long break between repetitions.
- Once the word is identified, turn the knob until the display shows the corresponding character and press the button.

International Morse Code	
1. The length of a dot is one unit. 2. A dash is three units. 3. The space between parts of the same letter is one unit. 4. The space between letters is three units. 5. The space between words is seven units.
